Dear Customer,

Here is a guideline of when to have selections made for your new home. These dates are not set in stone, but are strictly guidelines. If you find colors on an existing home that you like let me know the address and I can often match the colors.

Date Selection

- Front door style and garage service door style
- Shingle color
- Siding and shake colors
- Plumbing fixtures if different than contract specification
- Cabinetry style
- Stone
- Placement of electrical outlets and light fixtures
- Interior doors and trim if different than contract specifications
- Interior and exterior door knobs
- Exterior paint colors for doors, porch rail, and shutters
- Interior paint colors for walls and trim – generally I select the floor covering, countertops and tile at this point too because they coordinate with the paint, but it's only the paint colors we need to know for sure at this point
- Light fixtures
- Floor covering/countertops
- Bath hardware – paper holders, towel bars
- Cabinet hardware
- Appliances

Each supplier has a showroom and a design specialist to help you in the selection process. Please make an appointment for this and remember to bring a copy of your contract and the plan as well. See the attached list of suppliers for locations and phone numbers.
